

Social stabilization measures

The Prime Minister recently indicated that the Government is preparing a package of social stabilization measures which will help to buffer the economic impact of the coronavirus especially on persons who have lost their jobs because of the current situation. These proposed financial and economic benefits shall positively impact the small and medium-sized enterprises as well as the non-traditional sectors inclusive of the Creative Sector. By so doing persons, including artists and members of cultural groups who have lost their jobs or reduced income shall receive Government's support.
